EXPERIENCE

Codersbay Technologies / Product Designer

Nov 2025 - Present (7 months)

JustDeliveries HQ – Cold Chain Logistics Platform

Led the end-to-end design of a logistics control app supporting Intercity, Intracity, and Hourly Deliveries, improving operational visibility by 30%+ through centralized trip monitoring, tracking, and reporting.

Designed enterprise contract logistics workflows for daily and monthly recurring deliveries, reducing manual coordination efforts by 25% through workflow automation and streamlined scheduling.

Built real-time trip monitoring experiences integrating tracking, temperature compliance, proof-of-delivery, and financial visibility, helping operations teams respond to delivery exceptions 35% faster.

Designed booking, trip management, and operational workflows, reducing task completion time by 20%+ for operations users.

JustDeliveries Partner App

Designed the Driver Experience Platform by creating unified workflows for trip execution, live tracking, document management, rewards, and earnings visibility, improving workflow efficiency by 30%+.

Designed end-to-end trip lifecycle experiences including trip start/end verification, loading & unloading checkpoints, selfie validation, product image capture, and proof-of-delivery, improving operational compliance by 25%.

Built live trip tracking and trip history modules, enabling drivers and operations teams to monitor ongoing and completed deliveries with greater visibility while reducing support dependency by 25%.

Simplified trip document upload workflows through centralized management of PODs, invoices, and trip-related documents, reducing friction by 20%+.

Enterprise Operations Suite

Designed Admin, FinOps, WMS, and Vendor Management Platforms, improving process visibility and operational efficiency by 30%+ across multiple business functions.

Standardized operational dashboards, reports, and workflow systems, reducing information discovery time by 25% for internal teams.

Design System Foundation

Built the JustDeliveries Design System from scratch, standardizing 30+ reusable components across 500+ screens, reducing design duplication by 40% and accelerating feature delivery across products.

Established reusable design patterns across 7+ products, improving design consistency and developer handoff efficiency by 35%.

Covenant Technologies / UI Designer

Aug 2023 – Nov 2025 (2 Years)

Enterprise SaaS Platform

Designed and developed responsive websites, mobile applications, and enterprise platforms across Education, Hospitality, Technology, and Consulting domains, delivering end-to-end user experiences from concept to implementation.

Led the design and frontend development of CRM systems, Property Management Software, and financial applications, creating intuitive dashboards, workflows, forms, and data-driven interfaces for business users.

Created user flows, wireframes, high-fidelity designs, and interactive prototypes in Figma, while building production-ready interfaces using HTML, CSS, JavaScript, and Bootstrap to ensure seamless cross-device experiences.
